

HEAL Fellows Program

Health and Environment Allied Leadership

Are you a Ph.D. candidate or postdoctoral researcher in any college at Georgia Tech and driven to improve human and environmental health?

Gain the skills for promoting impact-driven research and initiating evidence-based actions as a HEAL fellow. Now accepting applications through July 12.

What is the HEAL Fellows Program?

The Health and Environment Allied Leadership (HEAL) Fellows Program is a NEW opportunity for Georgia Tech trainees to connect with peers and faculty across all GT colleges and receive interdisciplinary training to advance interconnected human and environmental health. Trainees will engage with regional and national academic experts, community leaders, and policy makers to initiate collaborations towards science-informed, sustainable actions with public impact.

What does the program entail?

- **Two semesters** (August 2022-May 2023), **6 hour/month** time commitment, **\$2k in additional compensation**
- **Six interactive workshops** training fellows in skills like community partnerships, system thinking, and more
- **Monthly topical seminars** with Georgia Tech and Atlanta-based experts on human and environmental health research, field challenges, and translational actions
- An **interactive symposium** organized by fellows, bringing together local and national academic, policy, and community experts
- Opportunity to design and initiate an interdisciplinary, translational project with fellow teams

Who is eligible to apply?

Postdoctoral researchers or Ph.D. candidates in **any Georgia Tech college** working in a field related to human health and/or environmental health, or any closely related field that aims to translate evidence-based data into public action are eligible to apply. **Open to U.S. and non-U.S. citizens.**

How do I apply?

By **Tuesday, July 12 (11:59 ET)**, applicants should submit an online application including a one-page CV highlighting relevant teaching, research, volunteer, and/or publication experience, a signed letter from their supervisor approving of participation in the program, and four short, personal statements as detailed on the application webpage.
